447 March Road,
Ottawa, ON, K2K 1X8

Cancer is a relentless adversary, but advances in medical technology have given rise to innovative treatments. One of those innovative treatments, assembled by Ottawa's BWXT Medical, is a medical device consisting of tiny glass microspheres containing the yttrium-90 isotope. This product offers hope to cancer patients, leveraging the power of targeted radiation to kill cancer cells within a tumour by delivering radiation directly into liver tumours through a procedure called radioembolization or Selective Internal Radiation Therapy (SIRT). It is approved by Health Canada and has been used to treat liver cancer patients worldwide. BWXT Medical is proud to be an important contributor in the global fight against cancer.

Learn more about BWXT Medical's products and services at www.medical.bwxt.com.

BWXT Medical Awards of Excellence

An important part of securing a stable supply of nuclear medicine products involves helping to develop the talent and expertise required to advance the industry. Each year, BWXT Medical recognizes three students at the University of Ottawa for academic excellence in a STEM-based program and to encourage their career pursuits.

In November, BWXT Medical was proud to present the BWXT Medical Award for Outstanding Women in Mechanical Engineering to Yomna Elsahli at the university's Fall Ceremony of Excellence.

Emily Porter, Director of Development and Process Engineering at BWXT Medical, presents Yomna Elsahli with a 2023 BWXT Medical Award of Excellence.

Seven in ten of respondents say they have a more positive view of BWXT Medical, after being told that its operations are strictly regulated.

Community Survey Results

BWXT Medical conducts community surveys to obtain feedback on its public information program, including its strengths and areas for improvement. The first survey was conducted in early November by Ipsos, an independent research firm.

Read more results from this survey on our website at www.medical.bwxt.com.

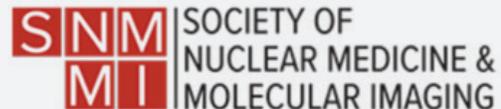

Save the Date: BWXT Medical at SNMMI 2024

The Society of Nuclear Medicine and Molecular Imaging (SNMMI) is a nonprofit scientific and professional organization that promotes the science, technology and practical application of nuclear medicine and molecular imaging.

Next year, SNMMI will be holding their annual meeting in Toronto, June 8-11, 2024, and BWXT Medical will be an exhibitor showcasing its innovations and capabilities.

Visit www.snmmi.org to learn more about this industry-leading event.

We're Hiring!
